

Aftercare Guide

Thank you for choosing Bella® Eyelash Extensions

Enjoy your beautiful new Bella® Lashes.

Proper care and maintenance of your new lashes will ensure beautiful and long lasting results!

During the first 48 hours

It takes 48 hours for the adhesive to cure (dry) thoroughly and yield a strong, durable bond. During this time, the adhesive bond is vulnerable to moisture, steam, excessive heat, cosmetic ingredients coming into contact with the adhesive bond and friction from rubbing and cleansing.

The following activities will result in a weaker bond, premature eyelash extension loss and /or irritation, and therefore should be avoided during the first 48 hours:

- Showering or wetting your eyelashes
- Exposure to heat, steam, sauna and friction
- Application of eye and eyelash cosmetics
- Sleeping on side or stomach
- Receiving chemical treatments, such as lash perming or tinting.
- Receiving irritating eye-area treatments, such as strong chemical peels, skin-resurfacing procedures, eyebrow waxing or laser treatments.

After the first 48 hours

After the first 48 hours, although the adhesive has fully cured, persistent exposure to moisture, steam, heat, incompatible cosmetics and friction from rubbing and cleansing may impact the durability of the adhesive bond.

The following activities will weaken the adhesive bond and result in premature eyelash extension loss, and therefore should be avoided:

- Excessive exposure to heat, steam, sauna and friction
- Use of oil based eye care products on or near your eyelashes, such as eye- cream, eye serums, Vaseline and cleansers
- Use of waterproof cosmetic products on or near the lashes, including waterproof mascara and eyeliner.
- Use of mechanical curlers.
- Picking or pulling on your eyelashes.
- Excessive rubbing your eyes.

Re-lash prices from initial application

60-minute fill \$60

75-minute fill \$75

After three weeks, a full set may be required @ \$120
